

Abdalsalam Al Birawi

I am a software engineer with good experience in problem solving, and experience in UI/UX. Always striving to become a better web developer. Friendly, professional, able to work alone or in groups, and under pressure.

WORK EXPERIENCE

Growth Hacker, Montreal, Canada | 6/2023 – present

Front-end Developer

- **User Interface Design Excellence:**
 - Spearheaded the development of intuitive and visually appealing user interfaces, incorporating industry best practices and standards.
 - Resulted in a noticeable enhancement of the overall user experience and a positive impact on user engagement.
- **Front-End Performance Optimization:**
 - Pivotal role in optimizing front-end performance through code reviews and efficient coding practices.
 - Resulted in a substantial decrease in page load times and a marked improvement in the website's responsiveness across various devices.

Uplink | 6/2021 – 6/2023

Front-end Developer

- **Codebase Optimization:**
 - Employed advanced profiling tools such as Chrome DevTools and React DevTools to identify and address performance bottlenecks.
 - Utilized React best practices, implemented code splitting, and optimized rendering processes for a 20% reduction in page load times.
- **UI/UX Improvements:**
 - Applied user-centric design principles using tools like Figma for wireframing and prototyping.
 - Improved UI enhancements with React and TailwindCSS to achieve a visually appealing and responsive user interface.
- **Banking Project Experience:**
 - Leveraged three years of experience working on various banking projects, ensuring compliance with industry standards and regulations.
 - Developed front-end solutions tailored to banking applications, focusing on security, usability, and performance.
- **Cross-Functional Collaboration:**
 - Implemented collaborative coding practices with Git and GitHub, reducing conflicts and ensuring seamless integration.
 - Employed continuous integration tools like Jenkins to automate testing and deployment processes, resulting in a 30% reduction in bug reports.

Craft Code, Syria | 2/2020 – 5/2021

Front-end Developer

- **Solid Foundation in Web Development:**
 - Acquired a robust foundation in web development, honing essential skills in HTML, CSS, and JavaScript.
 - Applied the principles of responsive design and accessibility, laying the groundwork for a strong understanding of user-centric development.
- **Seamless Transition to Front-End Developer:**
 - Successfully navigated the transition from a foundational role to a dynamic Front-End Developer at CraftCode Company.
 - Quickly adapted to the challenges and responsibilities of front-end development, demonstrating a proactive approach to learning and problem-solving.

STACK

Proficient: React, React Native, Javascript, TypeScript, Next.js, angular.

Familiar: C++, python, java, NodeJS, expressJS.

AWARDS

My graduation project was the best in the faculty with 98% grade, and it was nominated for the Syrian competition for best projects.

LANGUAGES

Arabic Native
English Fluent
German A1, beginner

EDUCATION

Aleppo University,

Bachelor in Software Engineering.

Sep 2017 - Sep 2022
